

CORN PRODUCT DATA

STINE® **NEW** MX514-O-E+ BRAND

Stine MX514-O-E+ Blend brand corn is great choice for a full-season line that features higher oil content for the conventional herbicide acre. It has the same base genetics as our MX514 family, which excels at higher planting populations. If acres are going to silage, increase the population by 10% to achieve the tonnage desired. This is a blend, so a percentage of the plants in the field will have different plant structures.

- Not intended for non-GMO market premiums
- Responds well to fungicide application
- Industry-leading fungicide and insecticide treatment
