

CORN PRODUCT DATA

STINE® **NEW** MX709-G-E+ BRAND

Stine MX709-G-E+ Blend brand corn is broadly adaptive across yield environments. It has the same base genetics as the MX709 family that works great for those acres where growers are seeking a high oil option. MX709-G-E+ Blend features a medium plant structure that would work for the silage market by planting 5% higher populations. This is a blend, so a percentage of the plants in the field will have different plant structures.

- Strong roots and stalks can handle variable soil types
- Medium plant/ear height will work excellent on gently rolling hills
- Industry-leading fungicide and insecticide treatment
