

CORN PRODUCT DATA

STINE® 9752-32 BRAND

Stine 9752-32 brand corn offers best-in-class above- and below-ground insect protection. It is a great choice for your corn-on-corn acres with a positive response to a midseason fungicide and nitrogen application. The taller, showy plant type makes it an excellent option for silage, and it works well in all row widths. 9752-32 is broadly adaptive across yield environments as a full-season choice. Using a fungicide is recommended for corn-on-corn operations.
