

CORN PRODUCT DATA

STINE® MX709-20 BRAND

Stine MX709-20 brand corn features two modes of action for above-ground insect protection. It produces a medium plant and ear height that's tall enough for gently rolling hills and is broadly adaptive across yield environments. It has strong root structure and stalks and can handle variable soil types. MX709-20 is agronomically solid but will benefit from a mid-season fungicide application when used in heavy disease pressure environments.
