STINE® 24EG23 BRAND

Stine 24EG23 brand is back with a vengeance in Stine's 2026 lineup. Quick out of the ground, good looking and showy, 24EG23 will consistently yield well in lower-yielding environments. 24EG23 does great in early planted, heavy ground environments with its superior tolerances to iron deficiency chlorosis and sudden death syndrome with a 1k gene for Phytophthora root rot. For best results, if Sclerotinia white mold is a concern, plant it in wider rows and let the canopy breathe.
