STINE® **NEW** 33EJ32 BRAND

Stine 33EJ32 brand is a sister to 34EH29, meaning it delivers very high yields consistently across highly productive soils in addition to bringing the added benefits of a strong tolerance to Sclerotinia white mold, Rps1c Phytophthora root rot resistance for protection on poorly drained soils, and above-average sudden death syndrome tolerance for early-season planting and strong late-season plant health.
