STINE® **NEW** 34EJ93 BRAND

Stine 34EJ93 brand has a lot packaged in a beautiful, appealing plant type. It's a shorter-than-average line with stacked nodes and very good standability, which enables it to be planted in higher populations. For best results, keep this line on wider rows if Sclerotinia white mold is a concern. 34EJ93 features top-end yields and thrives on highly productive acres, and Rps1c Phytophthora root rot resistance allows for earlier planting to further stretch yield.
