STINE® 08EJ32 BRAND

Stine 08EJ32 brand is a newer line that combines high-yield potential and iron deficiency chlorosis performance into one option. 08EJ32 yielded a massive 107% of trend in Stine's Elite Yield Trials and also features good tolerance to iron deficiency chlorosis and sudden death syndrome. Rps1c Phytophthora root rot resistance allows for planting in poorly drained soils with narrow-row, high-population strategies.
