

SOYBEAN PRODUCT DATA

STINE® **NEW** 08FH23 BRAND

Maturity	08
SCN Resistant	Brown Stem Rot Resistant
Rps Gene 1c	Height Medium

Stine 08FH23 brand is a sister to 06FH32, which shows its reliability and consistency across soil types. 08FH23 performs well across South Dakota and Minnesota in both high- and low-yield environments. It offers good, consistent performance against Sclerotinia white mold paired with brown stem rot resistance for later in the season. Plant 08FH23 at moderate planting populations in 20-inch or wider row strategies. This soybean will bring consistency much like its sister.
