STINE® **NEW** 18EK32 BRAND

Stine 18EK32 brand brings forward great genetic gain as the progeny of 15EE32. It is a standout with solid east-west movement across all soil types. 18EK32 has very good standability for narrow-row, high-yield environments. Its Rps3a gene and good tolerance to sudden death syndrome and Sclerotinia white mold enable early planting on poorly drained soils with little concern. 19EK02 is also its sister, showing its family success.
