STINE® NEW 19EK02 BRAND

Enlist E3® SOYBEANS

Stine 19EK02 brand brings forward family traits as the sister of 18EK32 and the progeny of 15EE32. 19EK02 is a shorter plant type that travels across soil types with very good standability paired with good tolerance to sudden death syndrome and Sclerotinia white mold, enabling early planting. 19EK02 also has the 3a gene like its sister, making it well suited for heavy, poorly drained clay soils. For best results, plant it on highly productive soils in narrow-row, high-population environments to get as many nodes as possible.
