

SOYBEAN PRODUCT DATA

STINE® **NEW** 21EK23 BRAND

Stine 21EK23 brand brings forward the highest yield potential of the early 2 maturity at 110.6%. This semi-branching soybean performs well across soil types and maintains its height on marginal soils. 21EK23 excels in poorly drained soils with the 3a Phytophthora gene paired with good tolerance to sudden death syndrome and Sclerotinia white mold. This enables 21EK23 to be planted early in moderate populations for solid success.
