## STINE® 24EH32 BRAND

| Maturity      |                          | 24 |
|---------------|--------------------------|----|
| SCN Resistant | Brown Stem Rot Resistant |    |
| Rps Gene 1k   | Height Medium            |    |

Stine 24EH32 brand is the highest-yielding mid-group 2 soybean in Stine's Elite Yield Trials at 108.3% of yield trend. What brings interest in it is its high-yield potential, good sudden death syndrome protection and very good standability. These attributes make 24EH32 ideal for a high-producing, narrow-row, high-population environment. For best results, avoid planting it where iron deficiency chlorosis is a known issue and open the canopy if Sclerotinia white mold is a risk.
