

SOYBEAN PRODUCT DATA

STINE® **NEW** 24EK21 BRAND

Stine 24EK21 brand is a versatile soybean for tough, marginal-ground acres with late-season disease issues. It contains strong tolerance to sudden death syndrome and Sclerotinia white mold, enabling early planting and use in narrow-row, high-population strategies. 24EK21 belongs on variable ground with the H3a gene for poorly drained soils, medium plant height and a beautiful, bushy plant type. It also has STS tolerance, providing an additional option for herbicide application in fields with weed control issues.
