

SOYBEAN PRODUCT DATA

STINE® **NEW** 36EK32 BRAND

A known progeny of the legendary 36EE12, Stine 36EK32 brand is a well-rounded soybean that is highly versatile across soil types and regions. It should be planted in narrow-row, high-population environments and can be placed in poorly drained soils thanks to its 1k Phytophthora gene. 36EK32 has brown stem rot resistance, strong tolerance to sudden death syndrome and STS tolerance, making it a solid candidate for early planting.
