

SOYBEAN PRODUCT DATA

STINE® 38EG32 BRAND

Stine 38EG32 brand performs well on heavier soils when planted at higher populations, and its lateral branching allows it to express its full yield potential. Branching, coupled with very good standability, translates into top-end yield potential at harvest. 38EG32 has good height, providing versatility across soil types, and has proven to be a good double-crop soybean option.
