STINE® 40EH92 BRAND

Stine 40EH92 brand is a favorite among many Stine independent sales reps. It brings a moderately short, salt excluder soybean to the market with great canopy abilities. This line offers high-yield potential and features STS tolerance. 40EH92 is also a great option for double-crop operations, as its shorter stature allows it to canopy quickly. If planting in poorly drained soils, a seed treatment for *Phytophthora* root rot is recommended.
