STINE® **NEW** 43EK92 BRAND

Stine 43EK92 brand has been dubbed a “big, strong variety” and is recognized for performing in tough soils. It has good, solid tolerance and performance across tough acres. Good frogeye leaf spot tolerance, high pH and salt excluder characteristics make this line desirable in Kansas, the Mid-South and the far East. Plant 43EK92 in any row association on moderate- to well-drained soils for excellent performance. If planting on poorly drained soils, consider a seed treatment for extra protection.
