STINE® **NEW** 48EK29 BRAND

Consistency is the word for Stine 48EK29 brand. In both appearance and yield performance, 48EK29 delivers reliably. Excellent frogeye leaf spot tolerance, good sudden death syndrome and iron deficiency chlorosis tolerance, and STS tolerance make 48EK29 desirable across the Mid- and Far South soybean-growing regions. This line maintains its height and performance across heavy soil types and promotes good standability at moderate planting populations in any row configuration.
